Landmark Kilometre Inventory

July 2017 Version (201707b)

Updated 2018-04-20

Contents:

- LKI Notes
- Landmark Types
- Index by Highway and Segment
- Index by Segment Number
- Segment Landmark Listings

This document is available at:

http://www.th.gov.bc.ca/publications/eng_publications/geomt/lki/lki.htm
P:\HQ\ENG\Safety - Highway Engineering\LKI\LKI_BC.pdf

LKI revision history information is available at:

http://www.th.gov.bc.ca/publications/eng_publications/geomt/lki/LKI_Revision_History.pdf
P:\HQ\ENG\Safety - Highway Engineering\LKI\LKI_Revision_History.pdf

KML files for the display of LKI information in Google Earth are available in file

P:\HQ\ENG\Safety - Highway Engineering\LKI\LKI201707b_KML.zip
(Warning: Latitude & Longitude data accuracy is variable. See notes below.)

The **LKI Maintenance Guide** is available at:

P:\HQ\ENG\Safety - Highway Engineering\LKI\LKI_Maintenance_Guide.doc

Produced by:

Cypher Consulting
250-337-8441
menicoll@CypherConsulting.com

Updates:

2017-07-04	- original release
2017-08-22	- corrected segment indexes (original had 201607 indexes)
	- LMtype on 191 FSR landmarks changed from A1 to G6
	- other minor corrections
2018-04-20	- many intersection landmark type updates
	- minor landmark description and LatLon updates
	- published as version 201707b

LKI Notes

Highways and Segments:

- "Highway" (Hwy) is synonymous with "Route" (Rte).
- Segments which are on more than one highway are listed only once, under their primary highway number assignments.
- Segments not on numbered highways are grouped under pseudo highway numbers in the 901 to 999 range.
- Segments which have been devolved to municipal jurisdictions are kept in the LKI for five (or more) years to facilitate reference to historical collision data.
- A revised segment is given a new number if any of its landmarks have different kms in the new version. This is so that there can be no confusion over which LKI version was used to reference a location.

Side: L - Left, R - Right, B - Both sides, M - Middle, A - Above, U - Underneath

Effective Date:

- this is the date when a segment's landmarks are likely to start being used by the RCMP on MV6020 accident report forms.
- the date is set when a segment has undergone a significant revision (which usually means it has been assigned a new segment number).
- for a July LKI release, this date is typically set to the following Jan 1.

Landmark Inventory Completeness:

The LKI aims to be a complete inventory of public road intersections, bridges, railway crossings, rest areas and traffic count stations along the included segments. Inclusion of other landmark types (signs, culverts, accesses etc.) depends upon landmark density in the area, and when the landmarks were gathered.

Additional Information in the LKI:

The source MS-Access LKI database, and the Excel export from that database, contain the following information which is not included in the PDF report:

- Segment Create_Date: the date of the LKI release in which the segment *number* was first used.
- Segment Revision_Date: the date of the LKI release in which the segment was last revised.
- Latitude & Longitude of each landmark. Accuracy is variable.
 - the LatLon_Source_ID indicates the source of the Lat-Lon.
 - sources are listed in the LatLon_Source table.
 - source 5 Lat-Lons are calculated from the Km, along the 2011 DRA geometry.
 - source 16 Lat-Lons are similarly calculated using CHRIS highway geometry.
 - for segments revised since 2012, Lat-Lons come from the RPMS photos or from Google Earth, so are quite reliable.
- Highway Classification
 - includes historical information
 - see tables SegClass, Class_Category and Class_Characteristic
- Nodes - unique identifiers for segment end-points. These are largely for the benefit of the Collision Information System (CIS).

LKI Location Transformations:

- procedures are available for individual and bulk transformation of LKI locations between LKI versions.
- use the contact information on the title page for more information.

Landmark Types

Code	Description	Notes
A1	Intersection with stop sign or flashing red lights, no turning slots	
A2	Intersection with stop sign or flashing red lights, and turning slots	
A3	Intersection with traffic control lights, no turning slots	
A5	Intersection with traffic control lights, and turning slots	
A8	Roundabout	
B3	Exit Lane Gore Point	
B4	Entrance Lane Gore Point	
B5	Runaway Lane	new 201607
C1	Controlled Railway Grade Crossing	
C2	Uncontrolled Railway Grade Crossing	
D1	Major Structure (visible in winter, e.g. bridge structures, overpasses)	
D2	Minor Structure (invisible in winter, e.g. culverts, cattleguards)	
E1	Weigh Scale	
E2	Ferry Ramp/Terminal	
F1	Permanent Traffic Count Station	
F2	Temporary (Short) Traffic Count Station	
G1	Commercial Access	
G2	Private Access	
G3	Emergency U-turn route through median of divided highway	new 201607
G4	Industrial/Utility Site, Frequent Access	new 201607
G5	Industrial/Utility Site, Infrequent Access	new 201607
G6	Industrial Road e.g. FSR	new 201607
L1	Number of Lanes Increases	was A7
L2	Number of Lanes Decreases	was A6
R1	Recreation Access in a National Park	new 201607
R2	Recreation Access in or to a Provincial Park	new 201607
R3	Access to Regional, Municipal, Forestry or Other Park	new 201607
R4	Other Recreation Access	new 201607
S1	Roadside Sign	
S2	Overhead Sign on Pole or Half Sign Bridge	
S3	Sign Bridge	
S4	KM or Mile Post	
XA	Service Area Boundary	
XB	Provincial Border	
XD	District Boundary	
XM	Municipal Boundary	
XN	National Park Boundary	
XP	Provincial Park Boundary	
XU	USA Border	
Y1	Rest Area (has toilets)	new 201607
Y3	Viewpoint	

Code	Description	Notes
Y4	Point Of Interest	
Y5	Pullout	
Y8	Small Dirt or Gravel Access	new 201607
Y9	Other Non-Private Access	
Z1	Miscellaneous	
Z2	Begin Segment	
Z3	End of Segment	
Z4	Civic Address Information
